Intellis.com (search.intellus.com)

Intellus is a social networking search tool which looks through most popular social networking sites using name, email, location or keyword. It has a very simple search interface with limited advanced search options. It returns the results in a standard search engine format.

Samepoint.com

Samepoint is a *social conversation* search engine that segments searches by: Social Mentions, Discussion Points, Bookmarks, Wikis, Networks, B2B Networks, Groups, Life Casting, MicroBlogs, Reviews, Podcasts, Documents, Video, Images, News and Web or all. The search functionality is limited with keyword only.

Socialmention.com

Socialmention allows you to search a word or phrase on specific categories of the social web including: Blogs, Microblogs, Bookmarks, Comments, Events, Images, News, Video or All. Although the search functionality is limited to keyword only, it does allow you to restrict your search to specific social networking websites.

Whoozy.com (Editor's Pick)

Whoozy provides a quick and easy name search that shows results from dozens of social networking websites and allows you to restrict your search to specific social networking websites. However, there is no advanced search functionality.

Wink.com (Editors Pick)

Wink has the most flexible search features of all the social networking search engines and displays the results in a typical search engine format on tabs for each social networking websites. You can search by name, username, location, email address, interests, school, tags and a while lot more.

yoName.com (Editors Pick)

With yoName, you can search dozens of social networking sites using an email address, username, name or phone number. Similar to Wink, the results are displayed on tabs for each of the social networking websites on which they were found..
